

# Forest Inventory

- Create GIS product and database of managed sites for potential restoration
- Focus on pine plant plantations and old fields
- Started with LandCover and aerial data layers
- More detailed inventory after site visits and consultation with staff
- Bigger picture is to get a better handle on all types of the forest stands.

Goose Creek State Park  
Base map

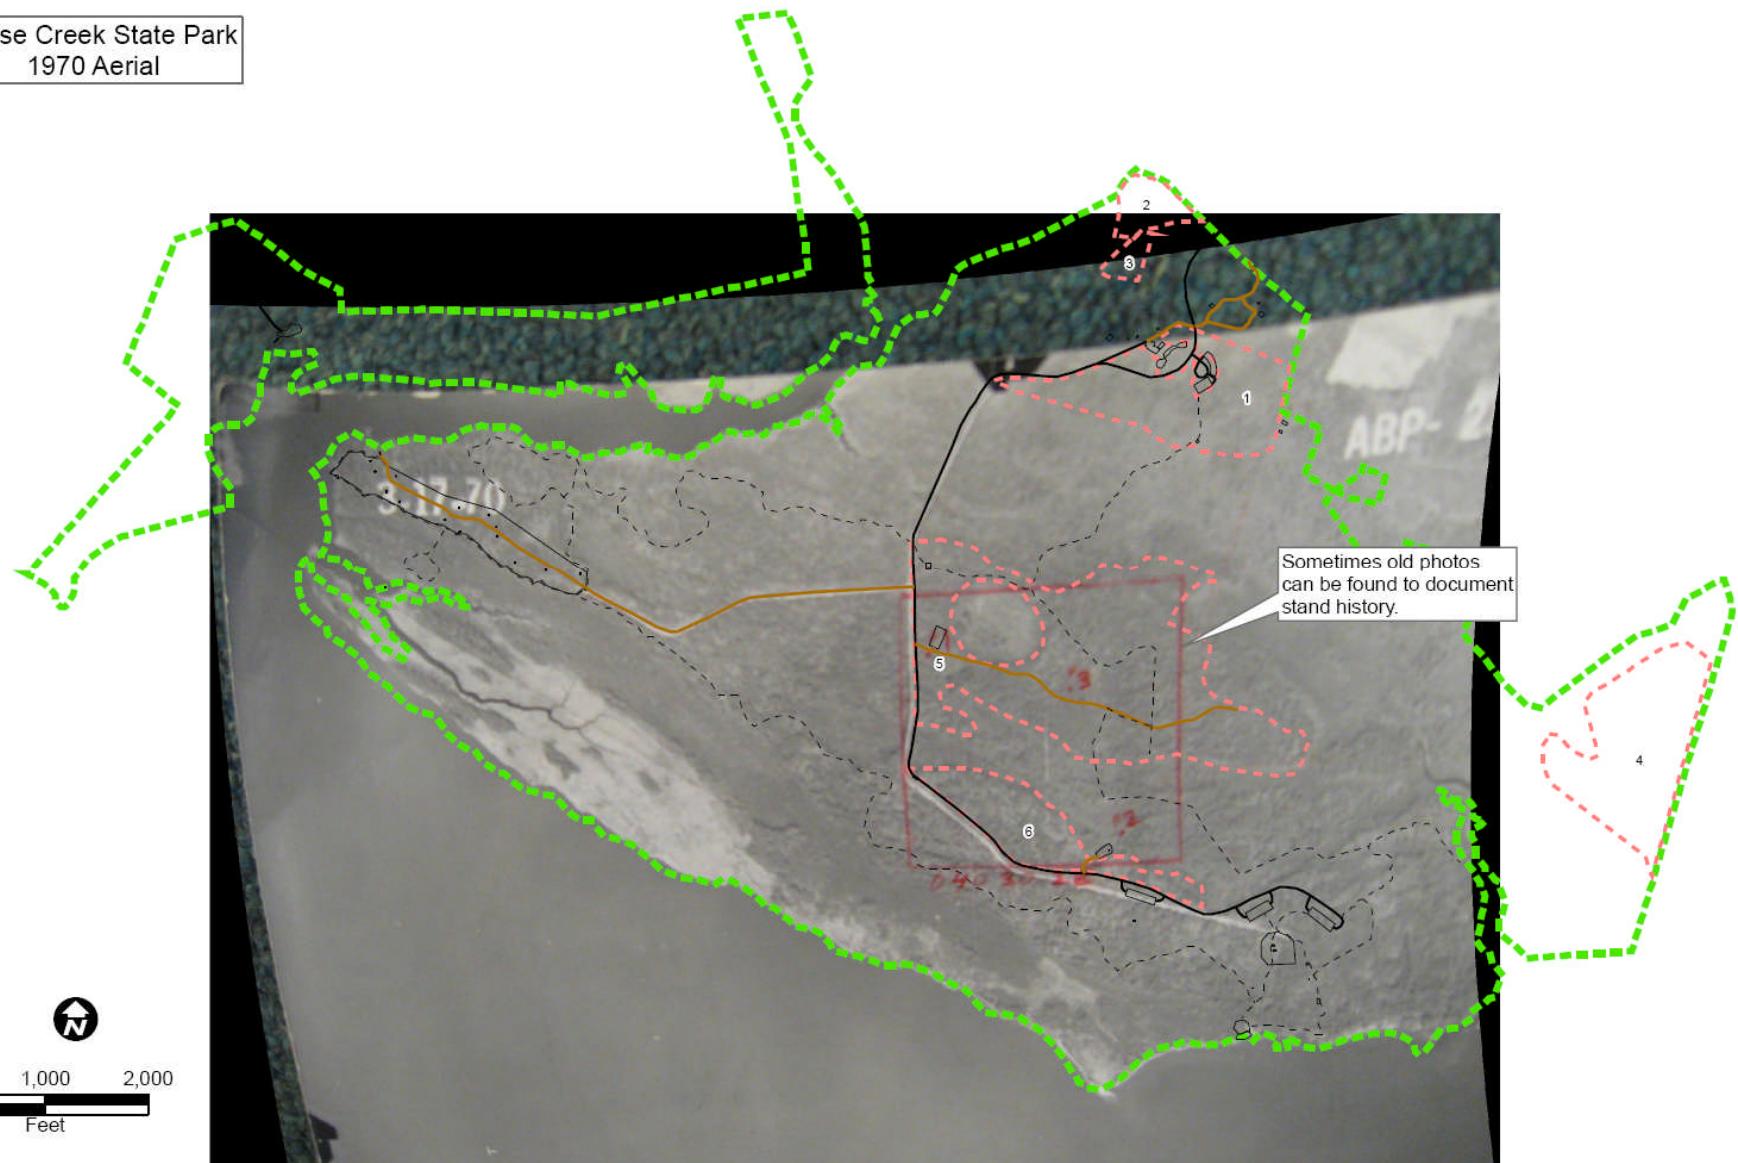

# Additional information

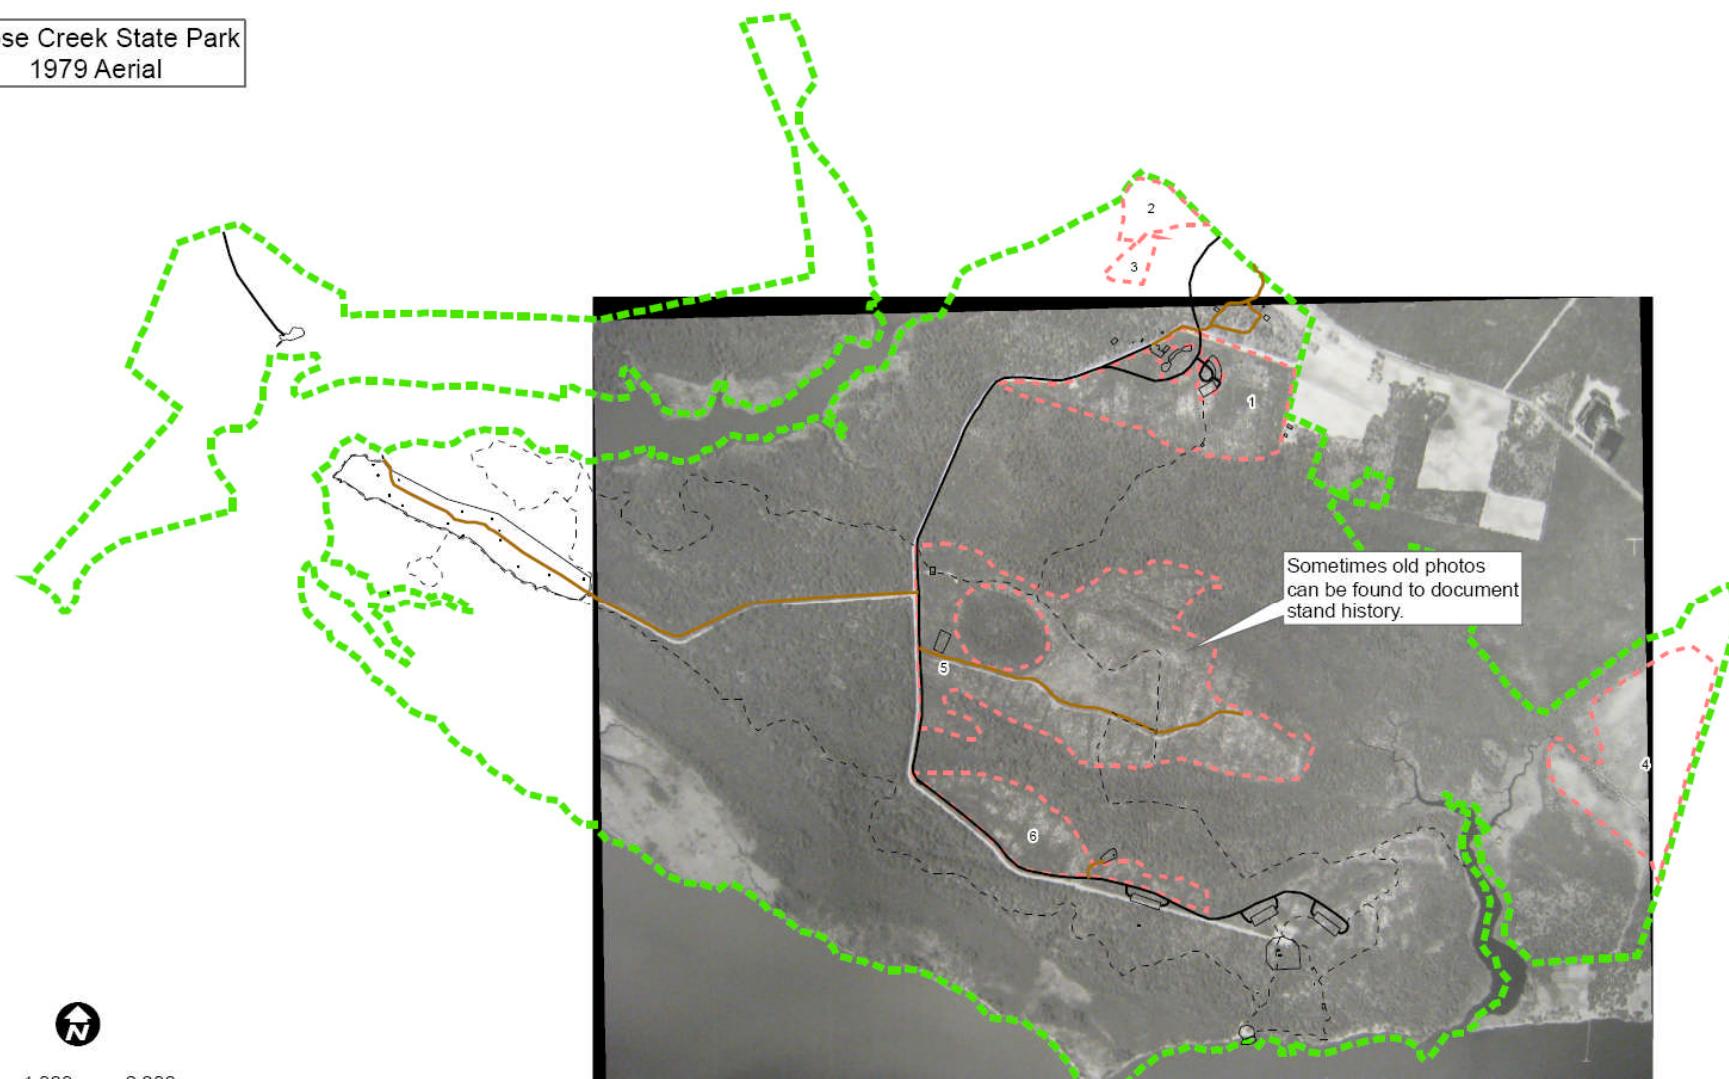

- Old photos can sometimes give stand history
- Data from former owners
- Site visits
- Staff knowledge is also collected
